

Linking Learning in Schools

How will outcomes be better if things were better connected?

What needs to be better connected?

How can better connections be achieved?

David O'Hagan Chief Information Officer
Queensland Dept of Education and Training

In the value chain of student educational outcomes from policy to platform to people - it's the people component that has both the greatest improvement coefficient and where the heaviest lifting has to occur.

The deeper the change envisaged, the longer and more sustained the change strategy must be.

“the user adds value”

Tim O'Reilly

Australian Education needs systems that support both the learner and the learning and promote sharing and collaboration at a national scale.

Share before **Buy** before **Build**

..... sourcing, requirements, benefits
, implementation, investment etc strategy

connect students with their learning

..... great things happen
